Yoshiro Morino

Full Stack Engineer

Blockchain Engineer

Dear Sir/Madam.

* I hope you are doing well and staying safe during this Corona pandemic. *

I just read your job posting and I am a full stack developer, having 6+ years of experience in building medium and big web applications.
I would like to inform you that I am highly skilled with Node.js, Firebase, MongoDB, WebPack, ES6, API Integration, as I have handsome experience in it.

As the modern JavaScript technologies came in, rather than using server-side rendering technologies tuned up with jQuery, I have been using Node.js, React.js, Vue.js, Next.js for 3+ years for Front-end development.

Also, recently, I have experience in developing Cryptocurrency trading sites such as Bitcoin, Ethereum, and NFT using Blockchain technology.

My experiences:
- Back-end and Front-end development
- Payment Integration (PayPal, Stripe, Worldpay...)
- Google Map & Social API integration
- Firebase, CloudStore, Google Cloud integration
- Third-party API integration and data reporting from social accounts like FB, Instagram and LinkedIn.
- WordPress plugin building and customization.
- Blockchain, Bitcion, Ethereum, polygon, CEX, DEX, DApp, NFT, Solidity, deFI games, swap, farms and staking
- Crypto Bot (Pancakeswap, Uniswap, Binance, Bybit, etc..)
- ICO Development with Created Token (Coin)
- Smart-Contracts (Solidity, Truffle framework) Token Dev. (ERC20, ERC223, ERC721, ERC 1155)

You can find examples of my past building site on the following links.
www.avaxrent.com
www.glovoapp.com
www.mylifecoach.me
www.alltherooms.com
www.pantherswap.com
www.mybae.io

I guarantee a high quality of work and keep good communication.
With many years of experience working with clients and in a group environment, I put stress on responsibility, communication, and efficiency when collaborating with clients.

All the best,
Yoshiro Morino
